Color drawings are necessary in this application since they are the only practical medium by which to disclose the subject matter sought to be patented. This invention relates to a system and method for color coding of words based on their pronunciation, for use as a teaching tool. The coding involves a large number of different colors representing vowels, vowel consonants, and non-standard consonant pronunciations. In some cases, a letter is coded with different background and foreground colors. This would be impossible to disclose clearly without the accompanying color drawings.

The petition fee of \$130 (37 C.F.R. 1.17(h)) under 37 C.F.R. 1.84(2)(i) is also enclosed herewith (see fee transmittal).

Respectfully submitted,

Dated: August 8, 2003
